30 Years and still innovating: Parking software provider gtechna celebrates 30th anniversary

Focused on security, customer success, and the convenience of self-service and workflow automation, gtechna continues to consolidate its leading role in innovating parking enforcement

Niagara Fall, NY **- March 1, 2022** - gtechna, a world-class software provider of applications for parking, code enforcement, and public safety markets, today announces its 30th anniversary. It's a significant milestone for a company operating in a market where commitment, convenience, and compliance are essential for growth. It's a reason for celebration and an opportunity to highlight partners and highly trained professionals that make gtechna a market leader in North America.

"While we may be celebrating our anniversary, we really couldn't have done it without the incredible partnerships we've built over the years," says Executive Vice President Michel Guay. "Between our vendor partners and the amazing people we've been lucky enough to work with in cities throughout North America and beyond, we've accomplished some extraordinary things together. And their support, dedication, and inspiration are certainly just as worthy of celebration."

The gtechna story began in 1992 with an innovative hi-tech start-up aiming to close a gap on the market with practical solutions for parking, police ticketing, code, and bylaw enforcement. Today, gtechna continues to innovate and leverage technology designed around convenience, security, and efficiency for municipalities and private institutions.

To date, they've been a valuable partner for over 100 organizations in North America, including Pittsburgh, whose digital transformation with Pay-by-Plate has established them as world-renowned leaders in parking and transportation management, as well as Washington D.C., whose ambitious goals helped the city to become micro-mobility leaders with their bike lane safety and enforcement program. Their goal is to continue setting new standards for parking, transportation, and mobility, and improving the quality of life for citizens in every city possible.

gtechna provides real-time off-street parking and curbside enforcement software as well as permit management to assist governments, private operators, transportation agencies and universities with its mobility goals. Known for providing future technology today, gtechna is now used to service more than 25 million tickets per year while increasing compliance and overall operational efficiency. Twenty years of successful collaborations with leading agencies in Washington, D.C., Greater Boston Transit, Toronto, Pittsburgh, Minneapolis, Seattle and Vancouver have seen the firm's growth into international markets including Australia, Sri Lanka and Malaysia.

gtechna enforcement applications are among the industry's best because the company continually invests in refining and developing its products to deliver solutions that empower its customers. Continued high-demand for gtechna technology in world-class cities has positioned the firm as the trusted source for reliable parking and mobility enforcement solutions. gtechna is a division of Harris Computer.
